

## BEARING RANGE

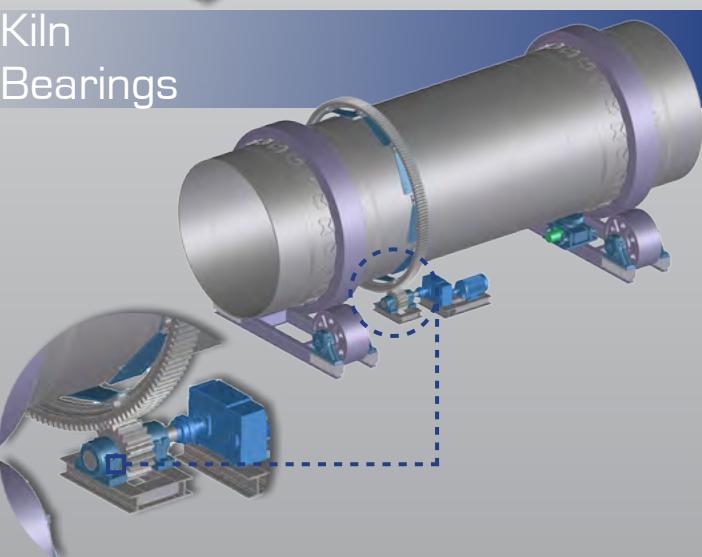

ALC TOURNAI HAS DEVELOPED ITS OWN DESIGNS AND MANUFACTURING METHODS OF WHITE METAL BEARINGS.

OUR DESIGN DEPARTMENT CAN ASSIST IN DETERMINING THE MOST SUITABLE SOLUTION BASED ON THE TECHNICAL REQUIREMENT.

### Mill Bearings

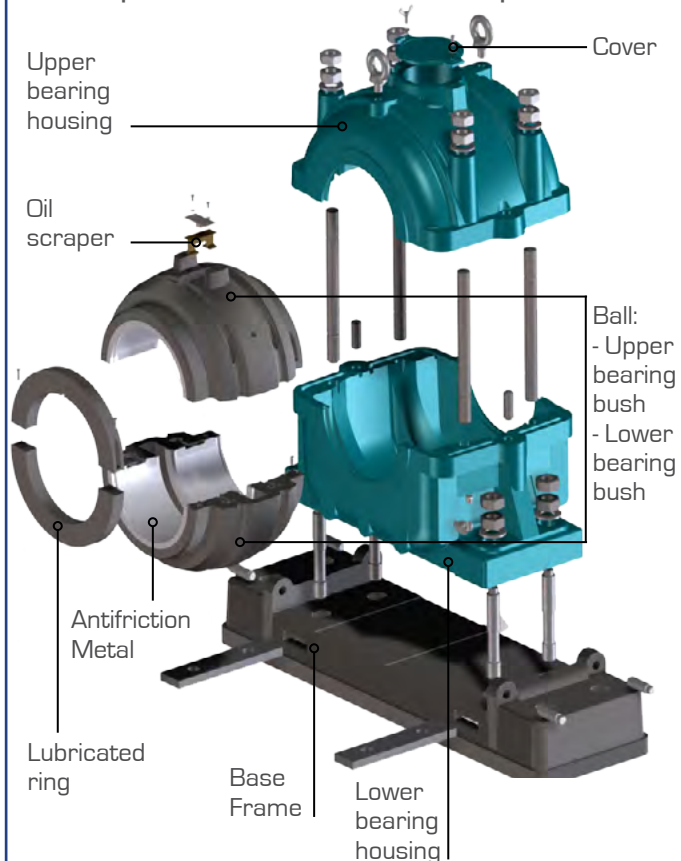

### Kiln Bearings

## Product Range

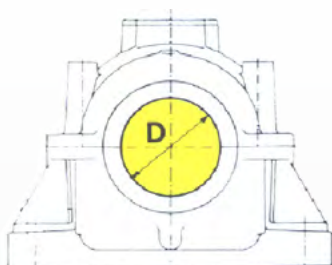

- Easy and fast assembly
- Excellent tolerance to shaft behaviors
- Minimal space requirements
- Unrivalled service life
- Low maintenance
- Self-alignment capacity
- Short replacement duration
- Optimized customer follow-up

# BEARING RANGE

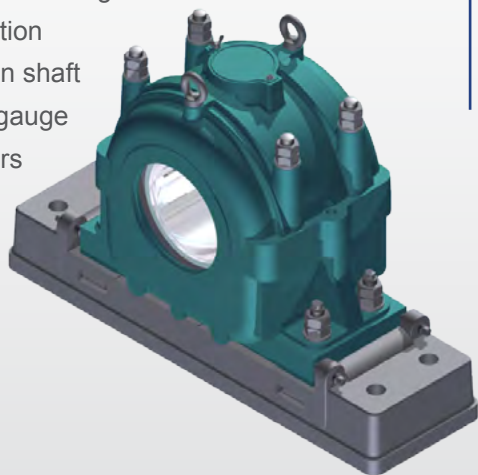

## ■ Shaft Diameters from 200-400mm

ALC can supply spare parts as well as complete assemblies with shafts.

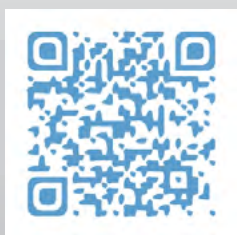

## Options and Services

- Additional water cooling
- Forced lubrication
- Adapted pinion shaft
- Temperature gauge
- Shaft en covers
- Base plates

Through the integration of its technologies, specialised equipment and qualified workforce, ALC Tournai can offer the best quality products at competitive prices within the shortest delivery times.

## Maintenance

ALC Tournai provides a high quality refurbishment service, restoring all types of bearings to their original condition.

1. Refurbishing or refilling of anti-friction materials.

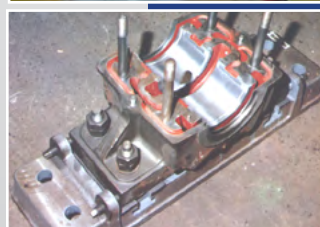

*We can use casting or rod regulating techniques*

2. Quick and easy replacement of bearing shells or rings with no shaft element disassembly

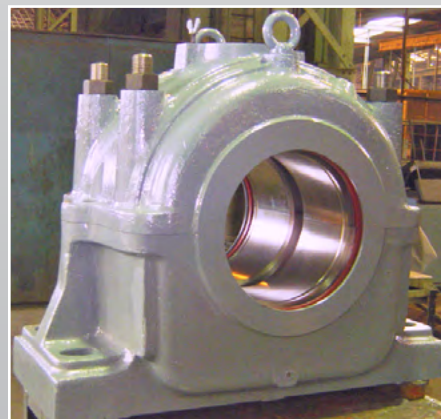

3. Repair in our workshop or on site

## Documentation

ALC provides customer with documentation for:

- Maintenance
- Assembly and lubrication

## DRIVES AND SLIDE-SHOE BEARINGS

ALC specializes in the redesign and improvement of drive and slide shoe bearings. ALC owns many patterns and has extensive references of drive and trunnion bearings.

Thanks to our efficient methods, ALC Tournai guarantees optimised manufacturing of customised slipper pads according to client drawings and specifications.
